Subject: Solar farms

I totally agree that we need to stop the massive solar farms that are destroying our beautiful land. Solar is touted as "green" energy, yet it is intermittent and requires the energy produced to be cleaned up before it can be used. Solar leaves us with the hardware that has to be disposed of when it is damaged or worn out. It also requires our natural vegetation to be demolished and precious land to be taken from our community.

Please work to stop this inefficient intrusion in our county!
