First of all I agree With all Testimony in opposition at last evening's meeting July 27th 2022. Water and traffic along with on sight waste water are the main concerns, however I for one do not think Prineville or Crook County will profit except for taxes, as they have nothing to offer as do Bend and Redmond.

I would like to call your attention to your statement in the code compliance folder about community livability.

However I do not agree with the commission on their unanimous decision to accelerate the hearing process at the request of the petitioners even though they said they could not produce all the information necessary to make an informed decision within the time frame.

I'm speaking now to maintain my right to oppose any decision and protect any rights I might have.

Wesley Rutledge
