We received today a post card indicating there is a proposed large resort development in our community. We are greatly concerned that this development will have both a safety and environmental impact. Crook County is already a high risk county for both drought and potential devastating fires. A development of this size will greatly impact the already stressed water supply. Highway 126 is already bumper to bumper traffic and early morning and evening commute times. I've experienced many times having to wait 5-10 minutes to enter onto the highway from Copley. Also, we have witnessed several accidents along this portion of highway with cars trying to pass traffic or turn off on side streets.
