Brent , I am running 120 plus cows between mothers and their weaners that I hold over to the next year , so they drink 10 gallon a day plus on the average when COID shuts down for the winter and they have been not running Stock Water runs lately because of the Drought in the winter , so if we lose the Nixon and everyone else loses their Well aquifer , me and everyone with Cows will need a Permit to pump water from the Crooked River , so that should be a part of the Crossing Trails Modification application , OK ???

Thanks you for considering this as part of the Modification permit for Crossing Trails resort .
